

February 2017

Dear Braintree,

This letter is to express my interest in your posting for the PM intern role. I'm currently pursuing a Masters in Computer Science at Cornell Tech in New York City, having received a Bachelor's in Computer Science prior.

I'm interested in Braintree because I value secure payment systems in my everyday life and recognize the upcoming generations appreciate a streamlined purchasing process that Braintree helps provide.

With my past projects, I have received very good feedback on my work done using Sketch and Keynote for rapid prototyping and presentation designs. My background includes internships involving web design and development using HTML/CSS/JS as well as optimizing the UI for Unity applications.

Through this internship, I hope to gain a start in a PM career. Since I have experience with product design already, I took the initiative this past fall by attending a part-time product management course in New York City through Product School. At 20, I will be one of the youngest students they have accepted but given my experience, they decided to admit me. Eventually, I would like to earn a full-time position at eBay after this internship.

Feel free to refer to [my web portfolio](#) and [Speaker Deck](#) for more examples of my product and presentation work.

Sincerely,
Frances Coronel
